Work Experience

**Build mobile application to help learning programming language s .
The project contains three languages, which are c#, java and
pythone. When clicking on a language, it moves to the levels within
the language. When clicking on a level, it takes us to the parts
within this level. When clicking on a part, it takes us to the existing
lessons. Within it, and when we click on the lesson, it shows us the
lesson, and then we move on to the test. There are a two-minute
timer in the test, and you choose. You numbered options, a line that
locks the account for an hour, and in this project there are a login
page, a singup page to create an account, a programming page, a
main screen page, a part screen page, a lessons page, and a Quiz
page. The language of php and flutter was used and mysql and
multiple languages app
